“Passionately aligning people to opportunities”

# About us

QLC (Quantum Leap Consulting) is a professional IT Solutions and Resourcing company based in Cape Town and Johannesburg and was formed in 2001. We provide a vast range of IT solutions in the Application Development space which includes, Architecture, Program Management, Business Intelligence, Business and Systems Analysis, Development, Testing and Development Operations and much more.

We believe that every opportunity is bespoke and it is vital to be flexible to the needs of the client. Henceforth, we look forward to helping you achieve your business goals on a personal and professional level.

## MISSION

To financially and intellectually empower all those associated with QLC.

## VISION

QLC offers a full range of innovative IT Resource Solutions designed to meet the specific needs of our clients. We use best practices proven by industry.

“Passionately  
aligning  
people  
to  
opportunities”

# Services

## Architecture

- Enterprise Architecture
- Solutions Architecture
- Technology Architecture
- Data Architecture
- Cloud Architecture
- Security Architecture

## Program and Portfolio Management

We have a team of highly skilled program and project managers who are ready to take on your projects using tried and tested methodologies. Our approach is one of equipping project teams with critical information required to optimise project delivery and ensure successful project execution.

## Networks

### Cloud

Cloud migration is the process of moving data, applications or other business elements to cloud servers, storage, or databases.

### Development Operations

The purpose of DevOps is to streamline the systems development process while also delivering features, fixes, and updates regularly in close agreement with business goals.

### ERP Implementation (Oracle)

As enterprise information and constructs are corralled into ERP systems, companies are able to align separate departments and enhance workflow.

## Business and Systems Analysis

Systems analysis involves the application of business goals to the IT systems of a business. In this case we make use of the logistics and results to come to a conclusion of them being acceptable from a corporate perspective or not.

Change management incorporates the organizational techniques that can be utilized in order to drive individuals to make effective personal transitions resulting in the adaption to change.

## Change Management

## Development

We have worked on various development projects and we have a vast pool of highly skilled and experienced developers ready to provide development solutions. The technical platforms include; Oracle, SAP, Microsoft, Java, Opensource and others.

The combination of our knowledge of Automated AI and Business Intelligence (BI), our knowledge of executive information systems and the use of various technologies in an organisation has positioned QLC to provide BI front-end customisation and solutions.

## Business Intelligence and Analysis
